The World's Great Handicap

In an address delivered recently at Watrous, Sask., Professor Swanson of the University of Saskatchewan, said he could see signs on the horizon of a return to economic sanity, but "fear is in the way." He said: "International fear, political fear, biological fear, fear of Japan, economic fear. Life is overshadowed and overclouded with fear. The time has now arrived," he added, "to take place of leadership in our country, in overcoming these fears. On the Western plains there is no place for this fear."

Then in the United States we have Bruce Barton, one of the most observant and sanest writers of the day, pointing out that the economists seem pretty well agreed that the bottom of the depression has been reached and passed and that business is fundamentally better all over the world, while of his own country he says it is now in the position of a sick man on his way back to health; that while a great many medicines are being applied, some of which probably help the patient's recovery and some of which hurt, the important fact is that health is returning, and that the country can stand a considerable dose of patent medicines without permanent harm, and that when the country is really healthy it will throw the patent medicine bottles out of the window, discharge the most radical doctors, and go on its way.

Bruce Barton, however, points to two very important things for people to remember and heed. It is, he says, vitally important to keep an open mind. Things never again are going to be the same as they were; on the other hand, they are not going to be so entirely different as some enthusiastic people would have us believe. It is, he says, no use sighing for the return of the good old days; it is even less useful to assume that all the past was bad and must be discarded. His advice is: "Keep moderate; keep flexible."

Most important, says Bruce Barton, "fight all fear," and he urges that the words of Thoreau be placed where they can be seen every day: "Nothing is so much to be feared as fear. The sin that God hates is fear; He thinks atheism innocent in comparison."

It is undeniably true that fear is the great obstacle to a return to more normal conditions throughout the world. It is fear that prevents disarmament and continues to impose upon the taxpayers of the nations the crushing burden of huge armaments, navies, air fleets, and the whole complicated paraphernalia of war establishments. It is fear that leads nations to erect hostile tariffs against the goods and products of other nations. It is fear that is keeping untold millions of money locked up instead of it coursing through all the channels of business and providing work and wages for countless thousands at present unemployed. It is fear that is distorting the minds of people and making them the easy victims of others who preach the gospel of discontent and despair.

Fear never makes for progress. Being destructive of constructive thought and initiative, it acts as a brake on progress, preventing the launching of new enterprises, discouraging expansion and further developments. Through the engendering of timidity and lack of self-confidence, fear leads man to withdraw into himself and behind isolation protective devices wherein he cowers but does nothing else. In a word, fear makes him a coward with a coward's outlook on life and its responsibilities.

It is the future of which most people appear to be fearful. They decline to recognize and accept the lessons and experiences of the past as having any bearing upon or offering any guide for the problems and experiences of the present. Instead, in their fear, they say present difficulties are different from anything ever before known, and consequently neither they nor any other person or persons know what to do or what ought to be done.

So, in their fear, they will not take actions which would not only accomplish something but would inspire others to action, and the cumulative effect of which would be a solving of difficulties. Work would be provided for hundreds and thousands of people now idle if others having some reserves would take their courage in their hands and proceed to have this or that or the other little job done which demands attention. But, no, they will not venture even a small expenditure and thus they retard progress and help to perpetuate a condition of things which, if continued, will mean their own ruin.

Wise parents seek to overcome fear on the part of their children. They do it judiciously but persistently because they realize that the obsession of fear is the greatest possible handicap in life. Wise leaders of the Canadian people in all walks of life should join forces in waging war on fear which now possesses so many, and they should join in the advancement of feelings of economic despair.

Saskatchewan Homesteads

Special Consideration To Be Given To Veterans Of The Great War
Granting special rebates to veterans of the Great War who served in an actual theatre of war, but also applying to all purchasers to the extent that free homesteads are practically obtainable again in Saskatchewan, new land regulations, retroactive to 1929, will shortly be announced by the government. Under the new regulations all provincial lands for sale will be advertised without end classification. Interest charges for 1933 and 1934 have already been forgiven and if conditions warrant, no interest will be charged in 1935. But, in any event, the rate will be cut to five per cent. Several thousand and buyers will benefit.

A factory at Stron, Maine, turns out approximately 50,000,000 toothpicks daily.

Alberta's Greenhouses

Value Of Sales In 1931 Was Placed At \$800,000
Though Alberta is thought of by most people as a country of wheat it has considerable space devoted to greenhouses. Alberta leads the other prairie provinces in this respect. The figures recently released at Ottawa show that in 1931 the province had some 642,000 square feet under glass in greenhouses not on farms, and in addition some 526,000 square feet under glass on farms. The value of the business done from these greenhouses in sale of flowers, flowering plants, vegetables and vegetable plants was placed at approximately \$800,000. These figures indicate that the greenhouse business in this province is a fairly substantial one.

Fatal cases of influenza in England numbered much less in 1933 than in 1932.

Household Drudgery
The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has hot flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

When you are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back good health.

Wingless Rooster In

Smithsonian Institute

Only Case Known To Science Where Such Birds Have Lived

A wingless rooster recently received by the Smithsonian Institution has defied precedents established by fowls that have been hatched without wings heretofore by living to grow into healthy adulthood minus the customary appendages. In all other such cases known to science the wingless birds have died while still young chicks.

The present specimen was found in the Rocks of Mrs. Otto Dearing, of Rose Hill, Ky., who sent it to the institution. Its behavior seems to be normal in most ways, but it is afraid to make jumps that would not bother an ordinary chicken. It hesitates a long time, for instance, before jumping from a table to the floor to obtain food, even when it is very hungry.

Far-Seeing Romanticist

Frenchman Predicted Photograph Long Before It Became Reality

Admirers of Theophile Gautier, the great French romanticist, point out that he foreshadowed the photograph many years before it became a reality. In 1847 Gautier wrote in *La Presse*: "One day it will be possible to make a polished plate receive and preserve the vibrations of sound, and thus conserve and perpetuate a melody by Mario, a tirade by Rachel, or a couplet by Frederic Lemaitre. Thus we shall be able to keep hanging on the wall the serenade of Don Pasquale, the imprecations of Camille, the love declarations of Ruy Blas—records of an evening when the artist is in good form."

KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for the new "GIANT" package. This consists of our regular 75c. bottle together with one week. Open the trial bottle first, put it in the sink, and wash your hands. Kruschen does everything we claim it to do, the regular 75c. bottle as good as any. Put back your drugstore, a sufficient return for the trial bottle and without question. You have tried Kruschen free, at our expense. "What could be better?" Manufactured by R. Griffiths Hughes, Ltd., Manchester, Eng. U.S.A. Importers: McGillivray Bros., Ltd., Toronto.

Migration To Old Country

Said To Be Healthy Sign Of Economic Conditions

Immigrants throughout the world are going back to the "Old Country." The International Labor office at Geneva reported, but said this was a healthy sign of economic conditions. Migration figures indicate the return to more normal conditions, the report asserted, while the most recent statistics show signs of improvement in different parts of the world.

SOURCED ON THE
WORLD?—THAT'S LIVER

Wake up your Liver Bile
—No Calomel necessary
Many people feel weak, sluggish and generally unwell, make the mistake of taking calomel, or other purgatives, which only make them feel worse. The liver is the source of bile, and if it is not working properly, the body will be weak and sluggish. What you need is to wake up your liver. Start your liver working the daily two capsules of Liquid Bile. It is the only natural and effective way to get your stomach and intestines working as they should. Order your bottle today. Carle's Little Liver Pills will soon fix you. Fully vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. See at all drugstores.

Answering Hurry Call

Firemen Were On Their Way But Forgot Address

From a member of the faculty of Sarah Lawrence College in Bronxville we have heard about the shock a Scarsdale family had one night about a quarter past eleven. Mummy and Daddy and the kiddies had all gone to bed when they heard the screeching and rumbling of fire-engines. The husband just turned over in bed, but the wife got up and went to the window. She saw three or four fire-engines standing precariously at her curb, puffing and chugging. And suddenly her doorbell rang. Shouting at her husband (who still didn't get up), she threw something about her shoulders and went down and opened the door. "Can I use your phone, lady?" asked a big fireman standing there. "Yes," she said. "Where's the fire?" "Gotta find out," he said, brushing past her. "We all forgotta address."—The New Yorker

Marvels of the Human Eye
By F. M. CROWE, Optometrist-Optician, Calgary

NO. 4—HYPEROPIA OR "FAR-SIGHTEDNESS"

The normal or standard eyeball is about twenty-four millimeters or one inch in depth. Such an eye with properly curved Cornea and Lens will focus the rays of light emerging from objects looked at on the Retina and the brain will interpret the image clearly and with comfort.

Should however an eyeball be too short or the Cornea and Lens too flat, the natural point of focus would be behind the Retina, which being impossible, dim or imperfectly focused vision is the result. Such is the Hyperopia eye.

Nature has provided that such an eye may overcome this trouble to a limited extent by forcing the Lens to become more convex (Accommodation), but this being a forced focus using up a greater amount of nervous energy than the rest of the body can well spare, sooner or later unpleasant symptoms develop in the form of headaches, nervousness, insomnia, unreasonable irritability, aches and stiffness in the back of the neck, habitual constipation, indigestion, in fact

the far-reaching effects of this condition cannot be estimated and yet it is the most common form of eye trouble. Ninety per cent. of children are born thus and many of them never attain to a normally developed eye. It should not be thought that this is a disease. It is merely a structural defect and science has again come to our aid with properly ground lenses to entirely neutralize the results of this defect and when worn eliminate the excessive drain on the nervous system which is followed by relief of the symptoms.

The term "Far-sightedness," often applied to this condition, is very misleading because a person can be so "Farsighted" or "Hyperopic" as to be unable to distinguish features across the street. It is more difficult for a "Hyperope" to see at close range than for distance hence the term "Far-sightedness." Hyperopia is almost always the cause of a child's eye being "crossed" or turned in.

(To Be Continued)

Kubelik's Fingers Valuable

Famous Violin Has Them Insured For Large Sum

The fingers of Kubelik, the violinist, are heavily insured. The first, second and third fingers and the thumb of his left hand are insured for \$15,000 each; the little finger is insured for \$11,000.

The right hand is cheaper. The first, second and third fingers are marked up at \$34,500 for the three. The thumb is assessed at \$4,500; the little finger at \$2,350.

The population of the Soviet Union is about 40 millions more than that of Continental United States.

Apricot Custard Tarts

1/2 cup sugar
1/2 teaspoon salt
2 egg yolks
1/2 cup mashed stewed apricots
1/2 teaspoon lemon juice
1 tablespoon Benson's Corn Starch
1 cup scalded milk
1 cup scalded vanilla
2 tablespoons sugar

2 egg whites
Mix and sift together the first quantity of sugar, the salt and corn starch, then gradually add hot milk and cook in double boiler until thickened. Add well beaten yolks and cook for a minute longer. Stir in the vanilla and cool. Pour the mixture into previously baked tart shells and cover with meringue made by adding the cold stewed apricots mixed with the second quantity of sugar and the lemon juice to the stiffly beaten whites of the eggs, and beating until the mixture holds its shape. Brown slightly in a rather hot oven.

Producing Poultry Meat

Experiments at the Central Experimental Farm, Ottawa, have shown that it takes 28 1/2 pounds of mixed grain to grow Barred Rock cockerels to twenty-six weeks of age, weighing an average of 6.68 pounds. That is, with a good class of Barred Rock chicks, 4 1/2 pounds of grain can be converted into one pound of meat. The lighter breeds consume an average of six pounds of feed for each pound of gain in meat.

Has Everything Needed

As a Negro physician, Dr. G. J. Mills, of Knoxville, Tennessee, brings folks into the world. As a real estate owner he rents them houses. As a doctor he can treat them if they become ill. As an undertaker he can arrange their funerals. Also the doctor can put the final touches to life and death. He owns a cemetery.

Austria now has less than 280,000 registered unemployed.

Fruit For Drought Areas

Forty-four carloads of fruit and vegetables have been supplied by growers of the Okanagan Valley to drought-stricken districts on the prairies. Twelve hundred boxes of McIntosh were taken from common storage at Penitence and shipped to Manitoba, Sask.

A SIMPLE QUICK WAY TO RELIEVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness Frequent Headaches
Indigestion Feeling of Weakness
Loss of Appetite Mouth Acidity
Nausea Sour Stomach
Auto-intoxication

WHAT TO DO FOR IT:

TAKE 2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new Phillips' Milk of Magnesia Tablets—25 and 50c sizes. Each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM
Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

OCCASIONAL WIFE

by EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to be married until she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Mason, her former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another girl are standing over them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis is stunned and Camilla's mother, likewise, Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, send for her and tell her they have a new account which requires unusual treatment of juvenile art. To Camilla's surprise she learns that the account is that of her foster father's company, which has decided on an extensive campaign to bolster up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of \$50.00 a week to start and a prospect of having it doubled. She goes to keep a dinner engagement with Peter. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household.

(Now Go On With The Story)

CHAPTER XXXIV

Peter was taking the stairs two at a time, intent upon returning to his work for the afternoon when he looked up to see a girl unlocking the door across the hall from his own. So, his new neighbor was a girl. His first intention was to ignore her, but curiosity prompted a second glance, and he found himself face to face with Avis Werth. He had not seen

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

W. N. U. 2037

her since the Hoyt party at the club. "Hello, Peter," she greeted him easily, as if she had been a tenant in Annex Hall for a long time.

"Why—how do you do, Miss Werth?" he could not conceal his surprise. "So you are the new neighbor!"

"Are you sorry?" she laughed at his consternation.

"Of course, not," he hastened to assure her. "What could be more pleasant than a friend for a neighbor? But I'm afraid you won't find me very sociable. I'm so busy these days I can't find time to eat."

"Working on your piece for the exhibit," Avis observed with an eager concern. "How does it go? I'm dying to see it, Peter."

He ignored that. "But why the outburst?" he indicated her spacious studio apartment.

She affected a pouting expression. "Is that nice of you? Can't I take art seriously as well as anyone? I took this place because I never can accomplish anything at home. Oceans of room, but no one will take me seriously or respect my privacy, so I came here to work. As for being sociable, I shan't trouble you because I'll be just as busy as you are. So there! Only," her eyes were lowered for a moment and then she lit her witfully, "there's an idea—there is one way, there's both might save some time. I am going to have a maid for mornings and you can run in here for a bite of breakfast or lunch, often. That will save some of your precious time that you can't spare to look up a restaurant." Her tone was practical and casual, as if she were re-adjusting the computation of time by the calendar and clock, to accommodate him, and yet doing nothing unusual.

He laughed tolerantly. "I'm afraid it wouldn't work out that way. We'd get to talking and take two hours out instead of a few minutes. Thanks, though, for your neighborly thoughtfulness." He was unlocking his door, but Avis made no movement to enter her own rooms. He pushed his door open and she sauntered across the hall and into his.

"Just let me have one peek, Peter," her voice coaxed. "I'll not say a word to anyone about your work. Besides, I want to see your rooms. I only had a glimpse of them once before."

"There's only one," he replied shortly. "Nothing to see, but come in if you wish. You know, art is more than an effect with me—it's my work."

They were in the room now. He left the door standing open. "Oh, it's beautiful!" Avis exclaimed. She moved over to the clay figure on the turnstand and stood gazing at it with genuine admiration. Finally, she said softly, "Peter, it's marvelous. The prize is already yours."

He laughed a confused denial of her praise, pleas' nevertheless.

"It's rather good, I guess, but I'm not thinking of the prize. How that it is almost finished. I am much more interested in the work itself. I think I might be able to sell it for a pretty good price if I do it in marble, in flesh tones, perhaps."

He was gazing at the figure with a fond and critical eye, as a parent regards his flesh and blood child. Avis might not have been present, for all he was not looking at her or thinking about her.

She glanced around the room for something to detract his attention from the clay figure on the stand. Her eye glimpsed a group of framed etchings on the wall. "What beautiful etchings! You did those, too, Peter? You're a genius!"

"No, Camilla did those. They are marvelous. I admired them, so she gave them to me." Rage seized Avis for a moment. She had drawn his attention from a clay figure, only to concentrate it upon Camilla. She managed to ask calmly, "Does she come here to see you often?"

"Not as often as I wish she would. But Camilla won't interfere with my work, she declares. So I have to be grateful for that. She's a good little sport. When a thing has to be done, she believes in doing it right. It has first place until it is finished."

Camilla, Camilla, she thought, does never talk not think of anything except Camilla and work? She feigned an incredulous surprise at her remark. "I should think nothing would take the first place from a husband." She shrugged. "But, then, all people aren't alike. Love and marriage mean so little to some girls. No wonder men can't understand them. They don't all know that a man needs love and sympathy and comforting to make him happy and keep him so," she observed wisely and with a tone of regret for all the wrecked marriages of such negligent wives.

"What do you know about it?" Peter only seemed to be amused. He did not attempt to defend Camilla.

"Some women are wives by in-

CHILDRENS COLDS

PROVED BY 2 GENERATIONS

stinct. They don't have to be married to understand men," she said maintained that sober, impersonal air of rare wisdom. Then she roused suddenly and said brightly, "But you haven't seen my place. It is just finished and I'm rather proud of it," modestly. "Please tell me if it looks right." She had caught his hand as if to lead him across the hall.

Peter drew away. "I'm sorry. I'll have to endure the suspense of waiting until later to see your place. My model will be here any minute and I've got to get to work. I told you I can't be a good neighbor, even."

"Then do come over this evening," she urged hospitably. "Any time you have a minute to relax, drop in. You can't work every minute."

"But I might interrupt your work. I thought you came here for seclusion," he reminded her.

"Avis lifted her hands eloquently. "One hour every day without an interruption would seem like a century to me. I can't go into seclusion all of a sudden. Besides, even if I do want to work, I can't take it that seriously. I expect to throw a lot of parties—studio stuff, you know. I'm giving a housewarming soon and you will have to take time out to there, don't you forget. You and Camilla," she added as an afterthought.

There were footsteps outside, tapping on the stairs and along the hall, and presently Sylvia stood in the doorway. "Hello," she said briefly, after a glance at Avis without recognition.

"Here she is!" Peter exclaimed with obvious relief. "My model, Miss Todd. Miss Werth, you may be needing a good model yourself. New prospect," he advised Sylvia, already busy with arranging his materials.

"Perhaps I can use you sometime," Avis told Sylvia with a patronizing air. "Well, then, I'll run along and let you two get to work. Bye, Peter," she smiled friendly, and sauntered out.

The new neighbor turned out to be an old friend; Peter explained casually.

"That's nice," observed Sylvia. "I don't know that it is so nice," he contradicted. "There is no worse nuisance in the world for a serious artist than a make-believe one who doesn't have to work, but maintains a studio just for effect and a place to entertain. It would be just my luck to get such a neighbor when I am the busiest. I'm afraid she's going to be a pest."

"You don't sound very crazy about her," Sylvia ventured carelessly.

"She's nothing to me," Peter shrugged. "I said she was a friend. She isn't even that—merely a acquaintance. One of the class at National. It's all the same to me if I never see her again. Fact is, I always made it a point to steer clear of her when I could. Now she lives across the hall and suggests that I run in to have tea with her," he grimaced.

Sylvia laughed with genuine amusement, knowing more about the situation than he was aware. Almost, she was tempted to warn him of Avis' intentions, for her sympathies really were with Peter. But her youthfully acquired sophistication maintained that any man could take care of himself. The chances were ninety-nine to one that any woman

got the worst of an affair with any man. That happened to be a rare case in which she wished the man luck, chiefly because he was not the aggressor.

Peter's prognostications proved correct about Avis becoming a nuisance. It was only the second day after their first meeting in the hall, when he had made no attempt to respond to her hospitable suggestion to drop in any minute, that she knocked on his door about noon, and to his curt "Come in," opened it with a cherry "Good morning, neighbor. What at work so early in the morning. Then I guessed it right—you are hungry. I just ran across to invite you over to lunch-breakfast. Billy has made hot biscuits that will melt in your mouth. Not a crumb living could resist that!"

She was lively provocative and informal in scarlet satin pajamas embroidered with gold dragons and Oriental characters that no Oriental ever would have recognized or deciphered. But they added their touch of subtle charm and mystery. Her long, narrowly plucked eyebrows that slanted downward at her temples contributed to that effect.

If one analyzed her features acquainted with the fundamentals of mathematics long before white men learned them, according to Mr. Gregory Mason, American explorer and archaeologist. "How many Americans realize," Mr. Mason asked, "that the Toltecs built a pyramid three times as great in bulk as the largest in Egypt, and that the Peruvians made tapestries finer than any of Europe, and that the Mayans invented over 200 years before the Hindus—which means that the Mayans were able to multiply and divide 1,000 years before Europeans could. The red-skinned natives of Yucatan, were better astronomers than the Europeans, and had a calendar far more accurate than the one Columbus was using and in some ways even superior to the one we use to-day."

Peter rubbed the clay from his fingers, irresolutely.

Ancients Were Clever

Made Use Of Many Methods We Consider Fairly New

Indians in Central America used aesthetics before Columbus made his voyage of discovery, and were acquainted with the fundamentals of mathematics long before white men learned them, according to Mr. Gregory Mason, American explorer and archaeologist. "How many Americans realize," Mr. Mason asked, "that the Toltecs built a pyramid three times as great in bulk as the largest in Egypt, and that the Peruvians made tapestries finer than any of Europe, and that the Mayans invented over 200 years before the Hindus—which means that the Mayans were able to multiply and divide 1,000 years before Europeans could. The red-skinned natives of Yucatan, were better astronomers than the Europeans, and had a calendar far more accurate than the one Columbus was using and in some ways even superior to the one we use to-day."

THE RHYMING OPTIMIST

By Aline Michaelis

THE SPELL

The driving rain has ceased with dusk. The sky is leaden-hued as day slips into night; No bloom in all the scene to catch the eye. Same slim flame-flowers, scarlet flames and white That in the glowing hearthfire leap and stir.

In such an hour at a dull day's close A name denied my lips stirs in my heart; And suddenly the world is touched with rose!

The old enchantment weaves its starry spell In seasons when my spirit is most sore; A dear, unspoken name and all is well, A name with power to wake the past once more. In moment that would else be wholly drear, A name which brings your fragrant presence near!

New Bird Discovered

Pugnacious Midget Is No Bigger Than Good-Sized Bee

A bird no bigger than a good-sized bee, found in the Haitian highlands, is described in a new publication just issued by Dr. Alexander Wetmore, assistant secretary of the Smithsonian Institution. It is known as the Hispaniolan verian hummingbird. In spite of its tiny size it is quite pugnacious as indeed most hummingbirds are, and does not hesitate to dart to the attack of birds as big as a mockingbird if it objects to their presence.—Science.

The radio has a great advantage over the political meeting in that the smallness of the audience can't influence the speaker's enthusiasm.

Brazilian coffee growers in 1933 destroyed 918,065 tons of coffee and brought the total destroyed since July, 1931, to 1,716,000 tons.

Medical Insurance Plan

Alberta Commission Investigates Possibilities of State Medical Service

An ultimate \$10,608,000 municipalized medical insurance scheme for the province is recommended in a report tabled in the Alberta legislature by a commission named in 1932 to investigate the possibilities of a general medical insurance plan.

For frontier districts the commission recommends a state subsidized doctor who would be assisted by a nurse. In some of these sections a nurse might suffice, the report says, with a travelling clinic available for minor surgery.

The body also reported that it is of the opinion that the existing schedules of fees for surgical and specialized services is too high."

For the present the commission recommends an expansion of the Alberta public health programme, more especially in the control of tuberculosis, extension of public health nursing service, and a re-establishment of a travelling clinic service for those parts of the province where a similar service is not provided.

It also recommends that the minister of health be given statutory authority to constitute areas as full-time health districts, and to determine what proportion of the cost of administration shall be borne locally and what share by the province.

Disposal Of Canadian Exhibit

Italian Experiment Station Bought Poultry Shown At World Congress

Mr. F. C. Elford, Dominion poultry husbandman and past-president of the World's Poultry Congress, has just received, through the efforts of the Canadian trade commissioner at Milan, Mr. Muddiman, a report on the disposal of the Canadian birds that were exhibited at the Congress in Rome last summer. Most of the birds went to the Italian Experiment Station, and it is of interest also to know that Prof. Ghigi, who was the general director of the Congress, selected Canadian birds for their own government work. Prof. Ghigi took home a number of breeding pens of Barred Rocks and White Leghorns, from Canada at the time of the 1927 Congress.

Britain's mail, during the year ended last March, totalled 6,940,000 letters and other packets.

It isn't necessary for a man to have pull if he has enough push.

How to Stop a Cold Quick as You Caught It

Take 2 Aspirin Tablets.

Drink full glass of water.

Repeat treatment in 2 hours.

If throat is sore, crush and dissolve 3 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin

IRMA HOCKEY TEAM CHAMPS GASLINE LEAGUE

Trim Viking Boys 3-0 in Final Game Here Saturday

By defeating Viking 3 to 0 in the fifth and final playoff game here Saturday evening, March 17th, before a large crowd, the Irma hockey boys won the distinction of being champions of the Gas Line Hockey League. The new champs played a fast, hard checking game to shut the locals out. The Viking boys were supreme last year.

Again and again the Viking team tried to get the puck past the Irma goalie, but he played an air-tight brand of hockey all evening.

Harry Lawes (he with the fast trigger finger) started in goal for Viking, when it was learned that Dean was indisposed. Gray McLaren came to the rescue later and relieved Lawes, and Gray played a stellar game from the non.

The new champions have played consistent hockey this year, coming from cellar position last year to top

this year which is a record for any team to shoot at. The Viking team has been at or near the top position all through the playing season and deserve a great deal of credit for their splendid showing.

Irma, Viking and Holden bolstered their line-ups this year which perhaps made faster hockey, but in most cases leaves a financial deficit at the end of the season for somebody to shoulder. Holden, we hear, has suffered considerably from this practice. Whether or not it is a good thing from a local standpoint is a moot question. A good playing-coach would no doubt be of benefit to any team.

At any rate, the race this year was very close between Irma, Viking and Holden, and the brand of hockey has been about the best seen along this line for years.

Main Street

Dr. Richardson, of Viking, has taken over the dental practice at Irma of Dr. Murray and will from now on visit Irma every Friday where he will continue to work in the rear of the drug store.

A very successful auction sale was held at the home of Mrs. Paul Meyers on Tuesday, March 20th. Mr. J. W. Stuart, of Wainwright, was the auctioneer.

Miss Winnifred Taylor resumed her duties as teacher in the Irma public school last Monday.

After spending a year with her daughter, Mrs. J. Fonton, Mrs. Magee left on Tuesday's train for Stettler where she will visit her two sons and a daughter.

Rev. J. R. Geeson went to Calgary on Monday last to attend a conference of the Home Mission Board.

Mrs. S. G. Simmons returned on Friday, March 16th, from Melfort, in Saskatchewan, where she had been visiting her daughter for about two months.

The Kinsella young people are presenting their play, "Here Comes Charlie" in Kiefer's hall next Wednesday.

Mrs. O. Enger Sr. of Winter, Saskatchewan, visited at the home of Mr. and Mrs. Martin Enger Wednesday and Thursday of last week.

Word reached Mr. James Fenton this week of the sudden death of his cousin Mr. James McKnight, of Vancouver. Mr. McKnight and his father were pioneers of the Irma district, having worked on the G.T.P. bridge across Battle river when the steel was put through and later took up homesteads in the Strawberry Plains district. Mr. McKnight Sr. passed away on the farm here sixteen years ago, after which his son sold the farms and moved to Vancouver.

Mr. and Mrs. L. Stougaard, went to Edmonton Tuesday evening. Mr. Stougaard expects to have some special treatment for his eyes, which have caused him considerable trouble

of late. A large crowd turned out Wednesday evening, March 14th, to the hockey club dance in Kiefer's hall, Irma. Mr. Jack Fletcher, secretary of the club, had secured the Northern Rangers orchestra of Edmonton to play for the dance. A large number of young people from other towns attended the dance and report having a good time.

AVONGLEN NOTES

Several from this vicinity took in the play, "The Deacon Ships," at Albert school on the 16th of March and report it a howling success and one of the best evening's entertainment of the winter.

The Harmony Local are sponsoring a hard time dance at Avonglen school on Wednesday evening, April 4th. Prizes for the most original costumes in keeping with the times. Coulman's orchestra are furnishing the pep.

School Fair for 1934?

Shall we have it or not? Come out if you are interested on Saturday, March 24th at 2 p.m., and talk it over. The department are furnishing seed and one judge, and short term course to winners of most points. We have had three successful fairs and a come-back is hard if we let it drop. A number of districts are rarin' to go.

ANGELICAN CHURCH NOTES
An Easter Service and celebration of Holy Communion will be held at the United church, on Sunday, April 1st, at 4 p.m. Also on the following Sunday at 3 p.m.

The next W.A. meeting will be held at the home of Mrs. Wilbraham on Tuesday, April 3rd.

MARY THURSTON
Secretary-Treasurer W.A.

FOR SALE—ONE TRIPLE GANG
Plow with horse attachment; a few hundred willow fence posts; also some short and long straw horse collars, sizes 19 to 23. W. R. Askin, Phone 317, Irma, Alberta. 16-30c

UNITED CHURCH NOTES

Beginning with next Sunday the pastor proposes to start a series of sermons on the Sermon on the Mount. This has been under consideration off and on for two or three years—in fact ever since the completion of the series of sermons on the Ten Commandments and the Lord's Prayer. This series of sermons on the Sermon on the Mount will not be of a protracted nature, but will be more general in scope. It is hoped that by means of these studies we shall have a clearer view of the teaching of the Master, and that we shall feel the challenge which His Truth brings to us.

The sermon next Sunday will be largely of an introductory nature under the title, "The Place of the Sermon on the Mount in Christianity." All interested are cordially invited to share in these services.
